

PARA-TEC 518-X

DESCRIPTION

PARA-TEC 518-X is a solvent based water displacing rust preventive. This product leaves a thin waxy film that is easily removed by alkaline or solvent base cleaners. PARA-TEC 518-X is designed for long term indoor storage of ferrous and nonferrous metals, up to 24 months, and for short term covered outdoor storage. Consider PARA-TEC 518-X for your more difficult protection needs.

ADVANTAGES

- Excellent water displacing properties
- Covered outdoor storage for up to 90 days
- Indoor storage for up to 24 months
- Non staining
- Easily removed
- Engine oil compatible
- 48 hour 5% salt spray protection
- Can be used on aluminum

PHYSICAL PROPERTIES

Appearance:	<i>Clear amber</i>	Flash point:	<i>142° F</i>
Viscosity:	<i>37 @ 100° F</i>	Pour point:	<i>-20° F</i>
Specific gravity:	<i>0.81</i>	pH:	<i>N/A</i>

APPLICATION

PARA-TEC 518-X may be applied by brush, roller, spray, dip tank, slush, or flow coat. If water displacement is needed, dipping is recommended.

DISPOSABILITY

Handle as you would for any petroleum based products. Spills can be cleaned up with any common oil absorbent.
